OFFICE OF PETITIONS

In re Application of
Coleman et al.
Application No. 10/759,277
Filed: January 20, 2004
For: HUMAN GLYCOSYLATION ENZYMES
Attorney Docket No: PF505D2
Pub. No.: US 2004/0142442 A1
Pub. Date: July 22, 2004

This is a decision on the request for corrected patent application publication under 37 CFR 1.221(b), filed on August 17, 2004 for the above-identified application.

The request is DISMISSED.

Applicant request that the application be republished because the patent application publication contains a material error, as the sequence listing filed with the application is not in the publication itself or in the PSIPS database.

37 CFR 1.221(b) is applicable "only when the Office makes a material mistake which is apparent from Office records." A material mistake must affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication, or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent.¹ The instant request does not identify a material mistake in the publication made by the Office:

The errors are not material mistakes because the application is a Divisional of U.S. Application 09/984,205 filed October 29, 2001, now U.S. Patent 6,333,182. Since, the parent application is patented and contains the information printed correctly, the errors do not affect the public's ability to appreciate the technical disclosure of the patent application publication, to determine the scope of the patent application publication or to determine the scope of the provisional rights that an applicant may seek to enforce upon issuance of a patent. The error also does not affect the use of

¹Changes to Implement Eighteen-Month Publication of Patent Applications, 65 FR 57023, 57038 (Sept. 20, 2000), 1239 Off. Gaz. Pat. Office Notices 63, 75 (Oct. 10, 2000) (final rule).

the patent application publication as a prior art reference, because the continuity data is correctly published and the patent has the best date as a reference. Furthermore, this is not a material error since the Image File Wrapper (IFW) for this application is available to the public, as of July 31, 2004.

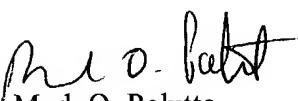

The applicant is advised that a “request for republication of an application previously published” may be filed under 37 CFR 1.221(a). Such a request for republication “must include a copy of the application in compliance with the Office’s electronic filing system requirements and be accompanied by the publication fee set forth in § 1.18(d) and the processing fee set forth in § 1.17(i).” If the request for republication does not comply with the electronic filing system requirements, the republication will not take place and the publication fee set forth in § 1.18(d) will be refunded. The processing fee will be retained.

Any request for republication under 37 CFR 1.221(a), must be submitted via the EFS system and questions or request for reconsideration of this decision, should be addressed as follows:

By mail to: Mail Stop PGPUB
Commissioner for Patents
P.O. Box 1450
